EDUCATION

University of Waterloo

Honours Computer Science (co-op)

- **GPA:** 3.95
- **Awards:** 95th percentile on the Canadian Computing Competition, Distinction on the Euclid Math Contest

SKILLS

Languages: TypeScript, Python, JavaScript, C++, C, Java, Ruby, SQL, HTML, CSS

Frameworks & APIs: React, React Native, SvelteKit, Node.js, GraphQL, Ruby on Rails, Google Firebase

Tools: Git, GitHub, Docker, Linux, Bash, Google Cloud, MySQL, SQLite3, NumPy, TensorFlow, PyTorch

EXPERIENCE

Full Stack Engineer Intern

May 2025 – Aug. 2025

StackAdapt

Toronto, ON

- Spearheaded the development of a new full-stack domain vetting system, designing 20+ **Rest API endpoints** with a **React and TypeScript** frontend to streamline the auditing process for stakeholders
- Led the modernization of two legacy **Ruby on Rails tools**, rebuilding them in **React** to achieve feature parity, improving performance and UX. Leveraged **manual and regression testing** to ensure no service degradation
- Standardized ad data classification across the organization, which enabled a new auto-approval system **eligible for 95% of ads**, reducing the product team's **manual workload by 50%**
- Engineered **cron jobs** to automate database cleanup, targeting outdated scan record data, **optimizing query performance** and **reducing storage usage by 90%+**
- Implemented a new error-handling strategy that **reduced Sentry errors by over 40%**, improving system reliability and reducing unnecessary noise for the engineering team

Coding Club President

Oct. 2022 – Jun. 2024

St. Robert Catholic High School

Thornhill, ON

- Led and organized Python and **competitive programming** workshops, engaging **150+ students** and driving a **50%+ increase in Canadian Computing Competition** participation
- Designed and executed **algorithmic problem-solving** sessions, enhancing students' proficiency in **data structures** and logic
- Spearheaded the development of internal coding events to simulate real-world technical interviews and improve problem-solving skills

PROJECTS

Full-stack Task Planning Web Application ([Link](#)) | *SvelteKit, Google Firebase API*

[Source code](#)

- Designed and engineered a **full-stack** task management system with an interactive UI, gaining **30+ active users** in under a year
- Implemented **Firebase Authentication** for secure login and **real-time database integration** for efficient state management
- Optimized front-end rendering and **state management using Svelte stores**, ensuring a highly responsive user experience

Python Instagram/Tiktok Clip Generator | *Python, Whisper, FFmpeg*

[Source code](#)

- Developed an **automated video processing pipeline** using Python, **cutting manual editing time by 95%+**
- Integrated **Whisper API** for high-accuracy subtitle generation, achieving **90%+ transcription precision**
- Automated video editing with MoviePy and FFmpeg, enabling **rapid production of over 50+ short-form clips** during testing

Read Aloud Chrome Extension | *Manifest V3, JavaScript, SpeechSynthesis API*

[Source code](#)

- Engineered a Chrome extension leveraging **JavaScript, Manifest V3**, and **SpeechSynthesis API** to convert on-screen text to speech, enhancing web accessibility
- Designed and deployed an efficient UI for user interaction, tested across **multiple web environments**
